TINTIC MINES

United States Company Said to Be Laying Wires to Gobble Them All.

STOCK EXCHANGE ELECTS

MICA MINES IN MILL CREEK TO Mine Near Pocatello Cuts Fine Ore BE OPERATED.

From a reliable source yesterday, came the information that while there was no real ground for relief that a consolidation of Tintic mines, as outlined says he has a volume of it that will enable him to get out and ship fifty tons per week. The main tunnel is into the hill 250 feet where the body of ore was was every reason to believe that the Mining company had designs on the camp. If plans that have been talked of mature, The Herald's informant declares, the company's Centennial-Eureka bonanza will eventually be the middle of a stretch of territory that will embrace every producing mine in the camp not already controlled by some other of the big corporations engaged in a business similar to that of

be involved," said the authority mentioned, "but every mine in the district that can be depended upon to supply the desired grades of silicious ore will gotiations carried out by direct representatives of the United States company. That big corporation has men on its staff that knows it would be fu-tile to attempt to gather in the control of properties it is going to some day require by stealthy methods; they know that the only way to get what they want is to go right in and negotiate openly and frankly with the men who can deliver the goods. I have no doubt but what the Centennial-Eureka is capable of meeting the requirements of the smelting company for a long time to come, but the mine cannot last forever, and the United States company is planning things on such a magnificent scale and with such regard to the future that it is not going to let anything that will be needed get away without a struggle.

WILL MINE QUARTZ AND MICA.

Salt Laker's Inventions Mean Estabment of New Industry.

The great ledges of quartz and mica in Mill Creek canyon, about fifteen miles southeast of Salt Lake, are to be actively worked and made to form the basis of a new manufacturing industry here. It will control the patents of Edward Covington, one of the old-timers of this city, recently secured by him and covering the manufacture of fire and waterproof compositions of which mica forms the chief component shift, \$5.50; timbermen (no helpers) \$5; machine work, 50 cents extra per shift more than hand work. Engineers, per shift, \$5.50; all contract work, \$1 per shift more than company work. No man in or around the mines will be allowed to work more than eight hours.

The carpenters have decided that the scale of wages for their craft shall be \$8 per day after Feb. 1. Just now they are earning from \$10 to \$20 per day. which mica forms the chief component

In addition to the manufacture of roofing materials and paints, it is the Intention to produce large quantities Colorado Fuel Has Experience in Getof ground mica, which is used so extensively throughout the world as a lubricant and non-conductor of electricity and heat and numerous other

mill will be erected in Mill Creek can-dence is contained in the following iten yon, close to the mines, and here the from an eastern publication:

"For some time Colorado Fuel has quartz and mica will be ground and placed in shape for shipment to market or the works here as occasion demands. Grande railways, are held by locations show that the cost of producing rails covering 640 acres, and, as the creek flows twenty-eight cubic feet of water the year, it is figured that, with a fall of 100 feet, all the power that will be get the ores from the Mesaba range to necessary can be developed here.

Mr. Covington says that roofing made of his patent material from these raw Utah products that was laid for testing purposes three years ago, bears no signs of cracks or leaks now. The material, he declares, is both fire and waterproof and practically as good today as when it was laid and exposed

Chiquita company, returned from a hurried trip to the company's Hoosier group of lead-silver properties in the Good Springs country, Nevada, yesterday morning. He says that while he does not care to boast of what is how. does not care to boast of what is being accomplished at the mines, he has not the slightest doubt that a real, genu-Ine mine is going to be made.

Work commenced in the ledge only a few months ago, but Mr. Oberndorfer says there is now sacked for shipment all of three carloads of fine ore, while not less than six cars more is broken

Most of Old Governing Board Named

to Serve Another Year.

The Salt Lake Stock and Mining Exchange election yesterday resulted in the election of the following board of governors, who will serve during the coming twelve months: James A. Pollock, H. W. Doscher, W. J. Browning, Joseph Oberndorfer, J. W. Hatfield, R. J. Evans, Timothy Egan, J. M. Hamilton and George T. Badger. A total of forty-seven votes were cast and James A. Pollock, who is the president of the exchange, got all but two, notwithstanding his absence in the east. All

and Badger.

The financial report submitted at the meeting showed that the treasury held \$754.88, and there was some discussion on the subject of raising the dues of members in order that a surplus might be accumulated. The new board of governors will meet at the office of H. W. Doscher at 4 o'clock tomorrow afternoon for the purpose of choosing officers, etc. It is considered a foregone conclusion that Mr. Pollock will be called upon to fill the president's chair again, and the hope is expressed by everybody having business with the examples in the near future.

Beck Tunnel, Black Jack, May Day and a number of other Tintic stocks have been quite active and strong during the week. while Carisa, Uncle Sam, Lower Mammoth, Grand Central, Mammoth and some of the other less active stocks have given evidence that they may take a spurt without notice. In fact, the week's market has been a good one all around. Following is the list of final quotations and record of sales made during yester day's single regular and open board calls:

Articles of including the dues of the other Tintic stocks have been quite active and strong during the week. While Carisa, Uncle Sam, Lower Mammoth, Grand Central, Mammoth and some of the other less active stocks have given evidence that they may take a spurt without notice. In fact, the week's market has been a good one all around. Following is the list of final quotations and record of sales made during yester day's single regular and open board calls:

Articles of included the near future.

Nevada Con. .2,

To MIN everybody having business with the exchange that James A. Shorten will be retained as secretary.

GREAT WESTERN HAS STRIKE.

Body-Will Ship to Mackay.

Manager M. G. Cardon says the future of the Great Western company's properties near Pocatello, Ida., never looked so promising as at present. About a week ago a large body of ore was encountered, which he is satisfied will run 15 to 20 per cent copper to the ton, and he says he has a volume of it that will enable him to get out and ship fifty tons. United States Smelting, Refining & been previously ascertained by sinking a Mining company had designs on the shaft. When the vein was reached crosscutting work was commenced and quite a quantity of ore was taken out. The recent strike was encountered at a distance of forty feet on the vein from the

main tunnel.

Mr. Cardon is now getting out a quantity of the ore as a trial shinment to the smelter at Mackay and is having samples of it sent to two or three assayers, so that he may have the benefit of the returns from varying sources. The ore the United States company.
"I believe that not only will the Grand Central, Mammoth and Victoria to the United States company will the Grand Central, Mammoth and Victoria belief that the company has a mine. In the course of development work on the property smaller ore bodies have been encountered from time to time that assayed from \$23 per ton and running away up into fabulous sums, but this is the first big body of ore that has the desired grades of silicious ore will be taken into camp. I am certain that wires are now being laid with such a purpose in view and that something definite will come of the plan before the present year has commenced to wane, I feel morally certain. It will not, in my judgment, come about through a consolidation of mines by outside or local company interests, but through neal company interests and the first big body of ore that has been found. The company is now engaged in putting in a track and steel dump cars in the main tunnel for the purpose of getting the ore to the dump nor readily. Manager Cardon is firmly of the opinion that this property will be opinion that this property will be opinion that this property will commence to ship ore as soon as the assays of the new strike is made. He can handle ore profitably that runs much

WAGES AT MANHATTAN MINES.

Miners' Union Adopts Scale and Establishes the Eight-Hour Day.

(Special to The Herald.)
Manhattan, Nev., Jan. 26.—At a meeting
of the Manhattan Miners' union last
Monday a scale of wages for the district
was adopted. In general the scale adoptwas adopted. In general the scale adopted is the same as was being paid before. The principal change was a raise in the scale for sinking. The fact that no distinction was made, but all sinking work included, has caused some criticism and some alarm among the less financially strong lesses. It is even said by some of the miners themselves that an exception for the first twelve to twenty-five feet on leases should have been made in the \$5 rate, per shift. This phase of the scale it is said, may be brought up by the union at some future date and modified.

The scale as adopted is as follows: Drifting, stoping and trenching, per shift, \$4.50; sinking and raising, per shift, \$5; working in wet places, 50 cents per shift extra, tool dessears and blacksmiths now The great ledges of quartz and inica extra; tool dressers and blacksmiths, per in Mill Creek canyon, about fifteen shift, \$5.50; timbermen (no helpers) \$5:

NEEDS UTAH IRON.

ting Mesaba Range Ore.

If anything has been needed to clinch the argument that the big iron and wrposes.

While the manufacturing establish
Utah iron, and that the Colorado Fuel ment will be located in Salt Lake, a & Iron company needs it now, the evi-

been shipping iron ore from the Mesaba range in Minnesota to its western The mines, which are distant only six plants in connection with the manu-miles from the San Pedro and Rio facture of steel. These experiments from Mesaba ores, as a result of the expense of getting the ores to the per minute during the dryest season of plant, is only slightly under the present Colorado four railroads are required,'

CARISA OPENING UP BIG.

Mine Manager Declares Property Never Looked So Well.

From four to six cars of ore per week are now coming regularly from the Carsa company's Tintic copper bonanza and,

CHIQUITA'S LEAD ORE.

Its Hoosier Property Promises to Be a Big Producer.

Secretary Joseph Oberndorfer, of the Chiquita company, returned from a spending arrangement expects to show the ore that it can today since it show the ore that it can tod

MINING STOCK EXCHANGE.

Week Has Been Lively and Market Generally Buoyant and Strong.

Business on the mining exchange during the last week exceeded that of the week before by practically \$5,000 a day, while the number of shares changing and in sight of the tunnel. A little later, when the weather has settled and the roads are in good condition, the movement of ore to market will begin and the expectation is to continue shipments with just as much regularity as the development of the mne along puroper lines will allow.

while the number of shares changing hands was nearly 10,000 a day more, on the average. For the six days a total of 244.065 shares of stock, with a selling value of \$135,377.03, changed hands.

Park City stocks had the call for most of the week, and the prices made were generally dictated by the seller. Tintic stocks also showed considerable activity and a general improvement in price, while the tone of the entire market was buoyant and strong.

of the old board was re-elected with the exception of three members. The new names in the list are Evans, Egan and Badger.
